## ADDITIONAL EXPERIENCE

**LEVEL SOURCE;** IOWA, INDIANA, COLORADO, MONTANA, VARIOUS - JUNE '15 - MARCH '16

*INSTALLATION/MAINTENANCE TECH-* Traveled on the road installing/maintaining wireless fuel level monitoring systems in vertical bulk fuel tanks. Installed, wired, plumbed, mounted, and set up level monitoring systems in which I used and operated a condor to install. Used my problem solving skills and mechanical skills regularly to make and properly mount, plumb and wire various different layouts in the neatest possible way.

**GAVEL AUCTIONS;** YORK, SC - JAN - MAY 2015

Drove to and loaded up various race car parts that were then taken back to the auction house where they were unloaded/sorted/listed/labeled and organized for the auction block. When we would have the auctions I was part of a team that kept all the items coming up to the block, in a fast and orderly fashion to be auctioned off. After items were sold, I then gathered all of a buyers items checking over the paperwork making sure everything was there and then paid for, also helping to load up the auctioned items. When it was all finished I helped clean, organize and restock the auction floor. Repeat.

**SCRAPPING/ODD JOBS ETC.;** ROCK HILL, SC - 2013 - 2015

During this time I did a ton of odd jobs, which lead to scrapping a lot of metal. I would get on craigslist and take all kinds of jobs from like moving people, yard work, painting, tree removal and so on and so forth. I did a lot of debris removal, which lead solely to scrapping metal. I would make posts for removal of debris and items, and while doing so would end up in contact with businesses that would regularly have items that I could take in as is or take to my shop to further scrap out for additional money. I honed my skills with hand tools and on the fly mechanical problem solving in order to disassemble various items.

**INDUSTRIAL FURNACE SERVICE HUB, LLC;** YORK, SC - AUG - SEPT 2012

Got contacted by a previous GLP co-workers brother that was tearing out and replacing a huge industrial furnace near my home. I helped them re-brick, rebuild, and plumb the furnace after it had been torn out and a new concrete base had been laid. I was brought in because of my great work ethic, plumbing experience, and eye for detail, as well as my quick learning, hands on work abilities.

**FAST GROWING TREES;** FORT MILL, SC - APRIL - JUNE 2012

*PACKER/VARIOUS-* At this nursery, I packed various types of trees and plants in boxes to be shipped.

**LINCOLN MANUFACTURING;** STRASBURG, OH - APRIL - DEC 2011

*CNC OPERATOR, WRAPPING/BOXING/BANDING, BUCKING UNIT OPERATOR, ETC.-* Worked just about every position required for getting raw cut pipe out the door as premium, highly quality controlled API couplings and fracking pipe.

**J&J PAINTING PLUS;** ROCK HILL, SC - JAN 2010 - MARCH 2011

Interior painting, odd jobs

**GREAT LAKES PETROLEUM;** CHARLOTTE, NC - JUNE 2006 - DEC 2009

*MAINTENANCE TECH-* Plumbed, assembled and maintained various fuel pump set ups on moveable and stationary bulk fuel tanks. Ordered and stocked necessary parts and equipment. Set up Smart Tank level monitors. Operated boom trucks and forklifts.
